Abstract. This article talks about the current work of the pedagogue and the development of the competencies noted in the standards of international evaluation programs. about the opportunities presented by him.

Key words: professional education, pedagogical competence, pedagogical skills, educational aspects.

In the 2021 academic year, the Teacher of the Year competition has several stages, and the nominations have been determined for high school students. 8 different nominations were established. Opportunities for further development of education were created for the passionate advanced pedagogues who won this nomination.

On the international scale, pedagogues participate in competitions in their field of specialization and achieve a number of achievements. The problems of creating an innovative educational environment are given special importance to the introduction of the requirements of international educational standards. It is to further develop and enrich the competence of pedagogic personnel for the continuous education system in our country based on advanced foreign experiences. Research work is being carried out on the creation of an educational environment aimed at modernizing the content of modern education, creating the necessary conditions that allow the realization of internal capabilities. On the further development of the Republic of Uzbekistan Strategy of Actions

1. further improvement of the continuous education system
2. increase the capacity of quality and educational services;
3. continue training of highly qualified personnel in accordance with the modern needs of the labor market

In this regard, improvement of the pedagogic system of formation of the educational environment aimed at the development of social and cultural competence on the basis of an axiological approach is of great importance. The physical and spiritual perfection and intellectual potential of the young generation growing up in the development of the society and the destiny of the country play an important role. Today, when threats and dangers are emerging, it is more important than ever to pay attention to spirituality and enlightenment, moral education, the desire of young people to learn and mature. will be raised to the level of the main priority directions, tasks have been defined and special attention is being paid to improving the quality of education.

Research Method and Methodology

The concept of competence entered the field of education as a result of the scientific research of educational psychologists. What is the dictionary meaning of the word competence. c) is derived from the Latin words "competentia" and "competentia", which means to achieve, to accomplish, to accomplish; it is desirable for holders of competence in various fields of great importance in the field

of education and in other fields to have Competence. It will be easy to achieve the result; it can be clearly observed in everyday life

The teachers were observed to improve their pedagogic skills, because at first the teacher was not interested because his knowledge was not enough, then he looked and tried a little, the competence was formed and developed and realized, the performance of the work shows that the competence has been implemented. they can prepare students for independent life by organizing processes of acquisition, formation of basic competencies, and effective preparation for social life.

Primary education teacher Sevara Mustafaeva's process of improving ICT literacy reduced the creation of presentations on renderforest.com and together with other streamers.

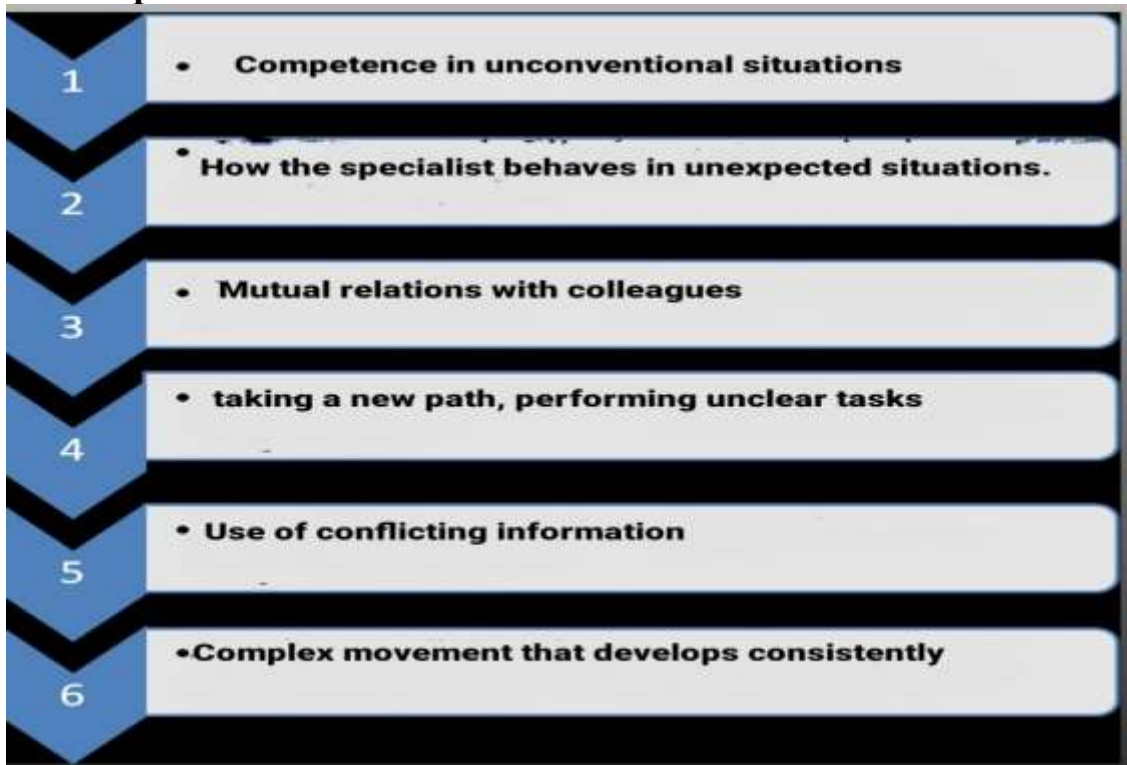

Teachers who have improved their ICT literacy have been awarded with a diploma and a certificate.

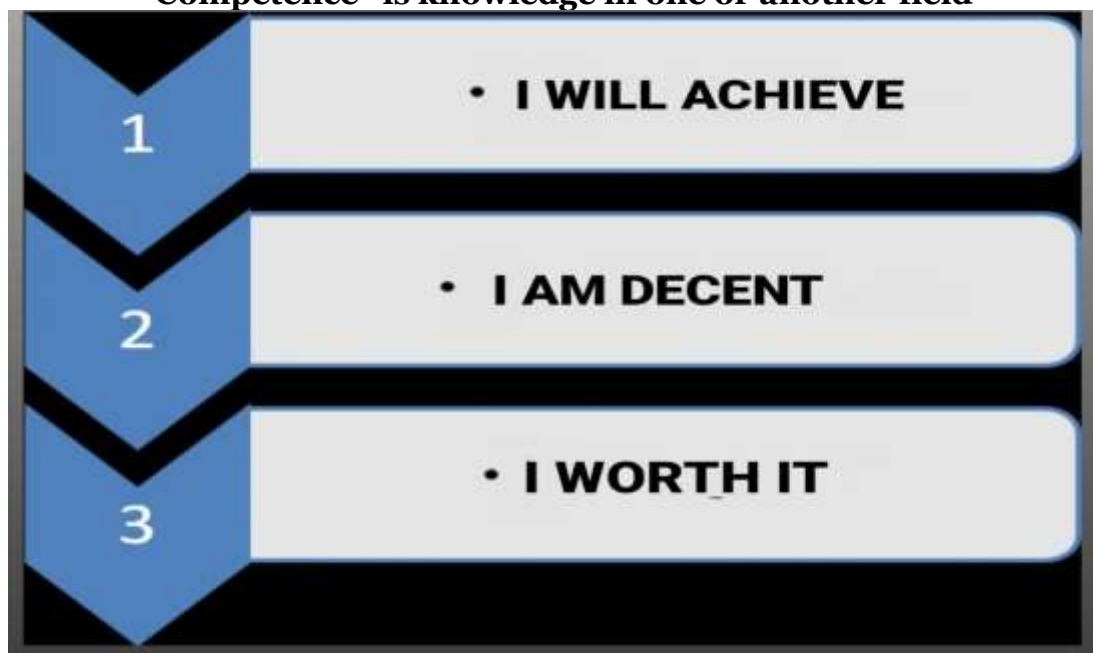

Here are the teachers reflected in the picture, who are making a small contribution to the development of education and working on it. Elementary school teachers of 6-24-10 general secondary schools of Ellikkala district of the Republic of Karakalpakstan organized the creation of various presentations on the Rendosfores site and made their activities interesting and exemplary. the formation of competence was observed. As a result of this research, teachers' opinions and opinions were organized. The increase of their interest in science leads to the formation of competence.

In terms of competence

"Competence" is knowledge in one or another field

1. powers, rights and obligations of a specific state organization (learning local self-government) or an official determined by law, regulation or other document are reserved.

2. It is a sum of knowledge and experience in one or another field. The social content of this concept is very broad and it is used in all areas of production.
