The key words: Military. Psychology, patriotism, education, soldier

As a fan including psychology _ military psychology and pedagogics function man mental of life basic laws from learning consists of. Our state defense enough degree protection to do able bulgan army mature without officer-commanders imagination to do difficult _ Students har one - sided mature individuals so in upbringing military psychology and pedagogy to the science itself specific has a place . Uzbekistan Republic President , our country Armed Strengths Supreme Commander-in- Chief IA Karimov of education importance about pausing , “... in our army healthy spirituality _ environment in creating education to work separately attention give , military preparation process ilgor technician and technological tools , new methods based on formed military _ _ of service intellectual criteria and directions improvement on the way started our business consistent to be continued we can it is a must . ” was . SHu in the sense of military to psychology oid knowledge and laws assimilation officers activities success provider criteria is one . Military pedagogy and psychology Fundamentals of Science future military education to the leaders Homeland protection ready which was suitable young generation high degree preparation for closely help gives _ From this except uni function man mental of life basic laws from learning consists of. Har a officer this laws know necessary . Military psychology and pedagogy learn military servant by itself other people their understanding _ mental cases account received without the work people _ _ positive , negative properties , their to themselves specific which are individual aspects which in the way and what because to the surface coming according to around _ _ atrophy surround received other people with communication installation help gives _ This is science seriously to study started har a person its both strong and weak _ sides according to takes , own on performance capacity has will be his positive qualities more improve , shortcomings esa lose to take

learns . Psychological knowledge assimilation service and training activities help gives , that is better understand , remember take stay , pay attention , think activities condition - conditions open shows . Of man mental his life aks provocative literature , language , history and other social sciences in the study of psychology importance is large . Jangovar and spiritual-enlightenment preparation training as in the pamphlet formed reach and take to go military in servants moral warfare adjectives formatting option provides _ It is also such adjectives formation in general military in communities of discipline depending on the situation will be . Experienced commanders education and education process formed in the process en divisions mental condition note received without it or this military servant ongiga how effect transfer they know . Knowledge , skill and skills capture laws , man tulaqonli person so kamol find paths did not know educators esa errors yul they pour . Such in case obtained results the goal with mos will not come , commander esa such imbalance cause does not know , as a result uzi take growing education in the case of shortcomings tuzata can not . Training and upbringing complex process and he is a military man servants ongiga so effect reach meaning tutadi-ki , toki they are jangovar actions successful take go for necessary bulgan knowledge , skill and skills let them reconcile . That's right effect under them more political

consciousness, military duty loyalty and Homeland mudofaasi for responsibility feeling such as adjectives formed. Educational and educational effect eng first of all of man to the psyche, to the mind focused will be. Such effect right formed reach for man psyche good to know need. Human psyche his in the senses, in the perception, in the memory, in the thinking and etc. show will be. Daily in life our har one of us uzga people mental activity show be we observe and we evaluate. For example, someone's to the mind, to the memory, to the imagination to the world admire we will stay, tasanno we say, or on the contrary, in others, sometimes esa in ourselves fast forgetfulness, neglect such as adjectives condemn.

Military activities, especially officership – activity complex and difficult activities one is. That's it reasons this activity per person falling physical and mental boredom only dependent without finding the officer military servants with, as well as technique and weapons with a at the time activity conduct with determined. Psychology point of view in terms of activity is different tools foy branch through there is needs to satisfy ionized behavior from the system consists of. Military activity instead increase tools (military technique, uq throw weapons ...) of and his participants (military servants) – do legal norms (military regulations, commander and chiefs commands) – to himself specificity with separated costs. Officer they are with while working this features urganishi and en activities to them reliance should. From this in addition to the military the team is also his socio-psychological to nature and content has and they too – specific to the laws based on develops. Risolada jangovar activity, personal content jangovar preparation in the process psychological harden such as a series military psychology – point of view in terms of important bulgan Also Suicide (en – joniga revenge make) event socio-psychological causes, nature and his received get paths great to learn attention focused.
