**Abstract:** In our country against to fight and in the field new changes and to him against new measures

**Key words:** Corruption, population corruption level, Moral corruption, Brilliant collars.

In our country independence years done increased wide scope reforms national statehood and sovereignty strengthening, poverty and law and order and society the law priority, human right and their freedoms provide for important the basement forms and of the people life forgiveness level and quality increase for necessary conditions creates \_

is being implemented reforms with one in line in our country to corruption against fight, him prevention get and young people to corruption against to fight in the spirit bring up priority from directions one being left. Why when you say dear the first our president IAKarimiv as they say " The future young people in his hand and tomorrow our future Manushu young people in the body that's why for of today young people to corruption against in fighting merger and him together eliminate reach need blown up going. From him except Uzbekistan Republic Crime Codex and " To Corruption against to fight about " gi Uzbekistan Republic Law efficient performance provide, society and state of life all in the fields of corruption prevention to get circle remedy events the own on time and good quality done increase in order to acceptance done state program performance provide according to special commission organize done, his main directions as :

- to corruption against to fight in the field state programs and another of programs work output and done increase organize reach \_

- to corruption against to fight according to activity done increasing and in it participation doer organs and of organizations activities coordination and cooperation taste

- of the population legal consciousness and legal culture promotion in society to corruption relatively uncompromising attitude to form circle of measures work output and done increase organize to do

- of corruption status and trends about information collection and analysis to do

- to corruption against to fight about the law documents improvement and this in the field things improve from the surface Suggestions to prepare

- to corruption against to fight according to territorial interdepartmental commissions activities coordination issues is determined .

This scientific and practical manual Uzbekistan " To corruption " of the Republic against about fighting \_ \_ \_ Law performance according to Uzbekistan Republic Decision of the President of February 2 , 2017 No. PQ-2752 with approved State program performance according to done increased scientific research grant number PZ-20170928486 as a result is being prepared and published .

In our country this the field more improvement in order to measures is being viewed. Uzbekistan Republic Legislation chamber Received on November 24 , 2016 done Senate approved by on December 13, 2016 ' ' To corruption against about fighting \_ \_ \_ the law acceptance done and corruption against to fight for from the steps taken one it has been let's say overkill will not. This In Article 4 of the law , `` corruption against to fight main saying the principles " passed .

**These are :**

- legality ;

- citizens rights , freedoms and legal interests priority ;

- openness and transparency ;
- systematicity ;
- state and citizenship your society cooperation ;
- of corruption prevention forward circle measures priority
- responsibility inevitability .

That's it telling transition must Uzbekistan Republic President of June 29, 2020 Uzbekistan in the Republic to corruption against to fight system improvement according to addition measures to [Decree No. PF-6013](#) HYPERLINK "<https://lex.uz/docs/-4875784>" according to Uzbekistan \_\_ Republic To corruption against to fight agency activities organize reach with to corruption against to fight for thrown away big and bold step it was

Come that's it this in the field the world scale how injuries to be used look if we throw

An example for :

**in Germany** a bribe taker to the official relatively three from five up to has been prison punishment risk puts \_ However court corruption with has been situation a little different . In the country a bribe taker judges up to 10 years from freedom deprived to be done can \_

**United Arab Emirates** to corruption against struggle laws special punishment mean holds \_ Here \_ of corrupt people just hand running thrown away

**in Thailand** On July 13 , 2015 corruption about to the law included to changes according to \_ a lot in quantity a bribe for scientist punishment will be appointed . This the law country citizens for foreign citizens as well one for \_ different action does. That with together , less quantity received a bribe for this too on the ground from 5 to 20 years prison punishment will be appointed .

From this apparently as it is in the east To the west relatively bribery for hard and sharp punishments fixed if we know will be. For now in the day do we know all fields developed scientists corruption the climax received countries the map make up came out being with `` red " in this defined in the states corruption the climax in " blue " colors while is relatively low . From this apparently as it is Ball in their countries to corruption against struggle for how much measures sharp baby, it's a climax take in the city

**Brilliant Collars** : *state management , political and of the economy high in echelon official of the person professional activity with depends corruption , the state management , economic and political in the field crimes excess without fuss happen to reach*

Come on to this of today eye with let's see today to corruption against who that he is struggling identify if we get this state To corruption against to fight about the law and Agency organize reach this all state by done is increasing but in this rather who suffering he smokes of course people. Corruption who are between a lot will be state organ and citizens in the middle corruption against to fight for in it more suffering smoking towards against to fight need i.e. " The People ". Why in Uzbekistan one to sex against to fight agency no because people this himself doesn't want therefore for when the people little to corruption against don't fight it is him root with to lose difficult moreover, his tip mani personal my opinion our society almost 2/3 of it young people organize is enough now we are young to generation corruption against to fight time came let's fly need. In schools right circle new science Society science science current to do offer I will. in this tomorrow owners in society right and obligations and in society bad to the sick how by doing legal see apply need knowing they get
