

Modern Methods of Teaching English and New Approaches

Ibrahimova Irodaxon Kamiliddin's Qizi

3rd-grade student at the University of Jahanda Languages in Tashkent

Annotation: Several effective English teachings in this article methods and language and modern education used to study it and a few of the technologies.

Keywords: Language, English, Language Learning, Teaching Technologies, Project, interest, activity, interactive methods.

While the February 26, 2019, issue of the President of the Republic of Uzbekistan raised the issue of allocating a 30 percent target quota for admission to the Academy of Public Administration for women and girls, especially so that our daughters can be more educated, the President of the Republic of Uzbekistan issued a decree on February 26, 2019 to provide their children with state higher education institutions and the Ministry of Defence, the Ministry of Internal Affairs, the National Guard and the State Privileges were set for admission to higher and secondary schools of the Customs Committee. For example, children of internal affairs personnel who were killed or disabled by injuries while fighting terrorism and crime and ensuring public safety were granted the right to enter higher education institutions on a government grant basis in addition to the specified admission parameters. This privilege is an unexpected consideration for young people: we are witnesses of patriotism and even more pride and pride in their parents. This is because the expiration date for these recommendations and submissions is also a wise step. In ancient times, Aristotle established a lyceum and the Aflotun Academy to improve the knowledge of the people, and our people opened a school at their own expense, we should not forget for a minute the most relevant topic of youth in modern times. The next day, it will directly depend on the intellect, worldliness, knowledge, and craftsmanship of the growing young people. It is important that the desire of young people to learn should always be viewed as a task in the first gallery. It is also noteworthy that during the 2020/2021 academic year, more than 145,000 students are enrolled in bachelor's degrees, or 15.6 percent more than in the school year, and 8,694 privileged grant quotas have been allocated to OTMs for this year's 2020/21 academic year. Preferential quotas are given to seven different categories of applicants. Beginning in the new school year, separate grant seats will be allocated at a rate of 4 percent for girls with a recommendation issued by the Ministry of Neighborhood and Family Support against approved government grants in the form of day-to-day education. Also, during the 2020/2021 academic year, the parameters of the state order for master's degrees in mathematics and natural sciences will be fully implemented on the basis of a government grant. It is also good news that 500 separate government grant quotas have been allocated to graduates of general secondary and secondary or vocational schools living in Sox County to enter OTMs. The process of submitting documents to enroll in master's degrees in each state-of-the-art institutions of higher learning, as well as to move and restore tuition to bachelor's degree courses, is also the most acceptable opportunity for young people to do so through the official website of the Ministry of Higher and Secondary Special Education of the Republic of Uzbekistan. This is the future of Uzbekistan as a star of hope for our people.

Young people who have seen such government policy will certainly support the proposal of our country's leader to establish an institute for homeland security and to organize the Work of the Philanthropic Example Advisory Council in order to reduce the number of family divorces among young people. At a meeting with young people at a school in Muhammad al-Khwarizmi on December 27, 2019, our President's initiative to establish a Youth Affairs Agency under the auspices of the Young People's Union, combining television and radio stations and printed publications directed to the growing generation audience, and the establishment of a "Young People's Media Holding". What young people see in life will surely believe in it and follow it.

Literature Analysis And Methods

In the research process, popular methods of teaching and learning English were used, as well as Internet sources. During the writing of the article, theoretical conclusions, analysis and synthesis, and logic were

used. Teaching and learning a foreign language using modern technologies is one of the most expedient methods. In this process, including: - when using computers, the reader can also hear foreign-language video roles, demonstrations, dialogues, movies or movies; - hear and watch foreign-language radio broadcasts and TV programs; - the use of magnetic field and cassettes, which are considered much more traditional methods; - CD players can be used. The use of these technical tools will make the process of learning a foreign language more heated and more effective. We know that in the current educational process, the student must be the subject. At the same time, focusing on more interactive methods will improve the effectiveness of teaching. One of the most important requirements for English lessons is to teach students to think independently. Today, English teachers, relying on the experience of the United States and English teachers, are using the following innovative methods: - Creative Problem Solving (Creative Problem Solving) refers to the judgment of students and students how the story will end to use this method; - Teaching students riddles (Merry Riddles) is important in teaching English, they learn words that are unfamiliar to them and find the answer to the riddle; - "Quick Answer" (Quick answers) will help improve the effectiveness of the lesson; - "Chigil Writing" ("Warm-up exercises") uses all kinds of games in the classroom to interest students in the classroom [3]; - "Pantomime" (pantomime) this method can be used in a classroom or in writing exercises that should be explained on very difficult topics and when students are tired; - The "chain of stories" method helps students to cultivate their oral discourse; - "Role Games" (Acting characters) this method can be used in all types of lessons. To teach craftsmanship, professionals such as "Interpreter," "Translator," "Writer," and "Poet" can participate in the lesson and talk to the students; - Poets and writers such as Thinkers meeting U.S. Shakespeare, A.Nebuchadnezzar, and R.Burns can be "invited."

Conclusions And Suggestions

In conclusion, teaching a modern language is aimed at forming a more civilized individual, who has the skills to self-analyze and systematize new knowledge. Innovative methods are an integral part of the modernization of the entire system. Confidently, teachers can get acquainted with the most advanced approaches and then integrate them and achieve significant growth in the education system by using them in their work.

Training in the educational process should focus on the formation of speech skills and the development of social flexibility. In addition, the success of each lesson in education depends in many ways on the proper organization of training. The lesson should be based on the creative cooperation of the teacher and the student. Only then will students be able to think freely independently and their will be nurtured. The resulting rise in sea levels from the meltwater could spell disaster for hundreds of millions of people. Such methods stimulate a student's appetite for knowledge. The reader strives to prepare carefully for the lessons. This makes students active subjects of the teaching process. As the education system makes it a task to educate a free thinker, perfect, mature person, in the future, we can contribute to the development of future teachers more perfectly ways to make the most of innovative technologies.
