Abstract: Military servicemen of the Armed Forces of the Republic of Uzbekistan "on August 4, 2018 of the president of the Republic of Uzbekistan the adoption of the concept of educating young people in the spirit of military patriotism on the implementation of the PP-3898-th decision " on the radical improvement of the system of raising the spiritual and educational level, the work carried out in cooperation with local government bodies to ensure army and people's unity provides an opportunity to fill the ranks of our national army with young people with strong will, active civil position.

Key words: Military servicemen

Our brave sons, who were purified under the protection of motherland, gained prestige with their bravery and courage qualities, a high sense of patriotism, our servicemen can be a comprehensive example and example for young people.

Shavkat Mirziyoyev

President of the Republic of Uzbekistan, Supreme Commander-In-Chief of the Armed Forces

Military servicemen of the Armed Forces of the Republic of Uzbekistan "on August 4, 2018 of the president of the Republic of Uzbekistan the adoption of the concept of educating young people in the spirit of military patriotism on the implementation of the PP-3898-th decision " on the radical improvement of the system of raising the spiritual and educational level, the work carried out in cooperation with local government bodies to ensure army and people's unity provides an opportunity to fill the ranks of our national army with young people with strong will, active civil position.

At the same time, today it is required to pay special attention to the issues of integration of vital and professional skills into the servicemen of the Armed Forces of the Republic of Uzbekistan on the basis of knowledge, increasing their knowledge in harmony with real socio-political changes in the life of our country, approach to the socio-political processes taking place.

In his address to the Supreme Assembly of Uzbekistan on December 28, 2018, President Shavkat Mirziyoyev said that " we have adopted a new defense doctrine, taking into account the growing threat to international and regional security". Indeed, the doctrine of Defense Of The Republic of Uzbekistan forms the basis of Defense policy.

In the concept of increasing the effectiveness of spiritual and educational work in the system of the Armed Forces of the Republic of Uzbekistan, the development of a unique system aimed at raising the spiritual level and spiritual potential of servicemen, as well as the formation of a worldview based on our rich culture, age-old values and traditions, the protection of the, to provide military servicemen with systematic and consistent information on the socio-economic reforms carried out in our country, the legislation adopted, the content and essence of state programs, formation of conscious attitude and active life position in relation to the globalization processes taking place in the world and around US, commitment to duty, responsibility, self-sacrifice, study and analysis of the historical roots, It is determined to set out on a systematic basis the wide propaganda of the life of our great ancestors and brave contemporaries, who showed heroism in the way of the freedom of homeland.

Accordingly, in the military personnel "the people of Uzbekistan will never be dependent on anyone!" it is of great importance to integrate the traditions of kindness and compassion into military servicemen, to develop humanitarian and compassionate relations, and to educate them on the basis of respect and respect for our national culture and values, dedication and loyalty, honesty and purity, independent thought and healthy lifestyle by finding a life-giving decision, and by deeply revealing the true essence The idea of the prosperity of the motherland is a creative idea that harmonizes the content of the sense of patriotism, the interests of each person with the interests of the country, motivates him to serve in the name of people's happiness. He

expressed the highest goal of national independence, the realization of the dreams of all citizens living in Uzbekistan related to the fullness of the country. The veneration, veneration and service of the motherland are also strengthened in Article 52 of the Constitution. In particular “protection of the Republic of Uzbekistan is the duty of every citizen of the Republic of Uzbekistan. Citizens are obliged to undergo military or alternative service in accordance with the procedure established by law”¹.

Any state sees its prospects in the image of a healthy and harmonious generation. The process of large-scale reforms carried out in our country, the realization of noble goals such as the construction of a strong civil society and a state of legal democracy cannot be imagined without the participation of young people. The priority directions of the policy of our state are the acquisition of education and training of young people at the level of modern requirements, patriotism, sense of belonging to this dear motherland, strengthening of health, bringing up a generation with a high power, knowledge and potential, broad outlook, thinking independently.

President Of The Republic Of Uzbekistan, Supreme Commander-In-Chief Of The Armed Forces Sh.LocationAs Mirziyoyev noted “continuous work on educating our youth in the spirit of patriotism is of great importance for us. Patriotism is the spiritual foundation of the life of every state and manifests itself as the most important mobilizing force for the comprehensive development of society”²

In most developed countries, state programs on patriotic education of citizens, conceptions of increasing the effectiveness of military patriotic education have been adopted, many public-based veterans and public organizations engaged in the upbringing of young people in the field of patriotism have been established, which are financed by the state.

On the initiative of the president of the Republic of Uzbekistan Shavkat Mirziyoyev, a new stage of reforms in the field of public policy in the military sphere and increasing the defense potential of the Armed Forces of our country has been launched. The Supreme Commander – in-chief of the Armed Forces, having talked with servicemen and heard the reports of officials, also pointed out the serious, systemic problems that have accumulated in the field for many years, and noted that “These are problems related to the issue of personnel, the provision of troops with modern weapons, the social protection of servicemen, the upbringing of young people and servicemen in the spirit of military patriotism,” he stressed[3].

At the same time, in order to increase the sense of belonging to the motherland in young people, the "concept of educating young people in the military-patriotic spirit" was adopted, approved by the decree of the Cabinet of Ministers of the Republic of Uzbekistan dated February 23, 2018 № 140. In Paragraph 2 of Chapter 6 of the concept, the issue of educating young people in the spirit of national idea and loyalty to the motherland, absorbing their hearts and minds that the protection of the Motherland is an honorable and sacred duty, proud of our ancient history and Culture, the issue of forming a sense of being worthy of them, to improve confidence in the power and potential of our national army has been considered[4].

It is known that more than 60 percent of the country's population consists of young people under 30 years of age. This shows that the law “on state policy on youth” of the Republic of Uzbekistan adopted on September 14, 2016 plays an important role. It is worth noting the large-scale work carried out in our country on the issue of youth. In particular, after the speech of the head of our state on June 30, 2017, entitled “physically and spiritually mature youth is our base and our foothold in achieving our noble goals” in the IV Congress of the social movement of Youth “Kamolot”, major changes in this field have been started. "Kamolot" OJSC was liquidated,” Youth Union " organization was established and its regulations were approved. June 30-Youth Day was declared in our country. In this speech of the president of our country, “the Youth Union of Uzbekistan should be a specific Center for the training of leadership personnel for the state and society, and, as we say in modern language, perform the function of” social lift" for young people. He emphasized that "educated, initiative and organizer, selfless young leaders should create a reserve of personnel."

In addition, the president of our country offered to establish the "future constructor" medal in order to name the cadets ' schools giving military education and training to young people as "School of Temurbeks", for

¹ Ўзбекистон Республикасининг Конституцияси –Тошкент, Ўзбекистон, 2017, -Б. 18.

² Мирзиёев Ш.М. Конституция – эркин ва фаровон ҳаётимиз, мамлакатимизни янада тараққий эттиришнинг мустаҳкам пойдеворидир // Халқ сўзи. 247 (6741)-сон. – 2017. 7 декабрь.

the young men who have achieved great results in various spheres and sectors, they also offered to establish the State prize named "brave sons", the medal "future builder" in order to award the young men and girls who are active in all aspects of the implementation, reading, Labour, public policy on Youth[5].

It should be noted that on July 5, 2017, in the decree of the president of the Republic of Uzbekistan № PF-5106 "on increasing the effectiveness of the state policy on Youth and supporting the activities of the Youth Union of Uzbekistan", the newly established Youth Union of Uzbekistan covers all categories and groups of young people of the country, uniting them. In particular, in order to strengthen the education of the military patriotism, "School of Temurbeks" was established in the areas of military education and training offered by the president of our country above, a state prize named "Mard o'g'lon" and a medal "future builder" were established in order to award young men and girls who are active in all aspects of the implementation, study, Labor, public Today, 14 regional councils of the Youth Union and 196 district (city) councils are functioning.

In 2017-2021 in the strategy of action on the five priority directions of development of the Republic of Uzbekistan, a special paragraph called "improvement of state policy on youth" was reflected and found its expression in the composition of one of the five priority directions of development of the social sphere. On the initiative of the president in all regions of the country, military and administrative sectors have been established. In cooperation with the representatives of the executive power, the Departments of defense work in these areas carry out practical work in the upbringing of young people in the spirit of military patriotism. The current globalization process requires the effective use of traditional and modern methods of educating young people in the spirit of military patriotism.

These include the following methods.

1. Method of propagation. It consists in perfectly revealing the educational and moral content of patriotism and the scientific and theoretical foundations of the processes carried out in our country in this regard, their new aspects. Therefore, to understand the feeling of military patriotism to young people as simple, laconic, consists in turning them into active and enthusiastic participants in the construction of a society that meets the requirements of a new life, modern times.

2. The method of communion. Today, the general combat splendor of our Armed Forces is determined by the degree of unity, detachment, combat splendor of parts and divisions. The military units, according to their internal structure, represent a social group whose activity is strictly defined, the general obligations of military personnel and the relations of services between them, internal procedures, duties of officials, daily and household conditions, the issues of employment of military personnel, the conduct of internal service are strictly defined in the discipline and the main cases of Internal Service.

3. The method of traditionalism. Military tradition the process of military service in the army is manifested in the norms of ideas, rules, customs, manners, which are historically formed, passed from generation to generation, connected with the performance of combat tasks, the preparation of personal composition, The Daily prison of servicemen. The system of military traditions in the Armed Forces includes the main three spheres of military activity: combat traditions; traditions of military life; educational and educational traditions.

4. Values priority method. It is impossible for servicemen to form a sense of patriotism without forming such human qualities as loyalty to national values, progressive traditions, moral principles, high culture. Because if we look at the nearly 27 years of independent development of Uzbekistan, we can see that a large-scale work has been carried out on realization of patriotism, the promotion of the brave and brave generation to adulthood. The main goal of the civil society, which is being restored in Uzbekistan, is also the formation of a generation that is not indifferent to the prosperity of homeland, peace of the country and the welfare of the people. In these serves as a pragmatic basis of national and universal values.

5. Modernity method. Difficulties, obstacles, inconsistencies, even an increase in the criminal act, a person with a pure conscience cannot erase the feeling of homeland in his soul, if he has become deeply involved. As long as there are social groups with diverse goals and interests in common, the perception of the general idea in a different way, Sometimes, contrary to each other, is also preserved. The birth of a new generation, the emergence of a new stage of life, transverse before society new problems; it is precisely this continuity, evolutionism that ensures the continuous, evolutionary continuation of social life as well.

In place of the conclusion, it should be said that the formation of a sense of belonging to the motherland in young people, a feeling of love and preservation of the motherland, has become a moral necessity. Today it stands at the center of Public Policy. It is evident that the satisfaction of this need by means of spiritual and moral inheritance will give an effective result. Our President is Sh. Mirziyoyev's words, patriotism is considered one of the most important values of our people. He is among the moral virtues such as compassion, sorrow for the fate of homeland, sympathy for worries and disasters. In particular, military patriotism is a special type and integral part of universal, nationwide patriotism. The integration of the ideas of military patriotism into the hearts of young people plays an even more important role in the state policy of the Republic of Uzbekistan.
