

Defense of the Country is a Holy Duty

Abdulloyeva Zebo Sanjar qizi

Every citizen has their own destiny, however
The military is not for him, but for the Homeland

Today we are on the eve of a great holiday in our country, which is of great importance to us and has been widely celebrated in our country for many years. Since December 29, 1993, January 14 has been designated by the President as the Day of Defenders of the Fatherland. There is little respect for the selfless soldiers who are carrying out such a huge task as the defense of the homeland. In keeping with this idea, the head of our state has carried out a wide range of activities, including a number of benefits for the military, work for the benefit of military families and children, a valuable gift to veterans of World War II on May 9 each year. 'a-greetings are being gifted, low-interest loans for the military, and benefits for those who have served in the military, for example. Calling on the youth to be patriotic, the President said: "O young generation of the great Uzbekistan! You have a lot of dreams, aspirations, and goals in this life. But never forget that you're greatest and most sacred duty is to preserve the independence of our country, the freedom of our people, to protect its security. "Defending the homeland is an honorable duty. The courage of our great ancestors, who showed heroism in the defense of the country, serves as an example for us, increases our love for our homeland.

The homeland is the place where we were born and raised, the land where our umbilical cord blood was shed, and the sacred place where we grow up. It is our great heritage and cherished memory that will be passed down from ancestors to generations. Prosperity of the homeland, peace of the country is a priceless blessing, a great happiness. From time immemorial, humanity has strived for peace at all stages of its development. Where there is peace, there will be development, there will be peace, and that is why we must preserve the freedom and independence of our homeland. It is the duty of both the family and the society to bring up young people in the spirit of patriotism, to be able to legally convey to them the duties and responsibilities facing them. In particular, a person who has a sense of homeland has a high level of pride, and his goals are clear. People's love for the homeland is instilled in him by mother's milk, mother goddess, and parental love. The soil of the homeland is sacred, that is why our ancestors smelt the soil of the homeland and breathed in the memory of the homeland wherever they went. No one can be happy without leaving his homeland, he seems to have a flaw in his heart, and if he is disrespected in his own country, he will not be appreciated in another country. In this sense, it is clear that we, that is, all people, are closely connected with our homeland. Most of us have heard the wise saying, "Loving one's country is a matter of faith." It has been narrated from the Prophet (peace and blessings of Allaah be upon him) that there is evidence of love for one's country. One of them said: When the Messenger of Allah, May Allah bless him and grant him peace, was expelled from Makkah, he said goodbye to Makkah and said to him: If my people had not expelled me from you, I would not have lived without you. "Narrated by al-Tirmidhi. The more we describe the homeland, the less and we now return to our main topic.

After many years of colonial rule, our state came to the square of independence and reorganized its policy, system and economy. This period is comparable to the first steps of a newborn baby to a bright life, and these steps go through a lot of difficulties until he is able to stand on his own two feet. From the first days of independence, strengthening the defense of our country our army embodies the most advanced experience of world military construction, and at the same time continues our national military traditions with high devotion. Today's youth are the guardians of our independent homeland. If we bring up the

younger generation as harmoniously developed, mature people, if we consistently form honor and national pride in each of them, our country will become such a powerful state. Thanks to the large-scale reforms carried out over the past period, it is compact, fast, well-organized, and able to reliably protect the security of our country, the inviolability of our borders, to prevent any malicious wars against the peaceful and serene life of our people. Our national army, equipped with modern weapons and military equipment, has been formed. In terms of the strength of our army, our country is one of the leaders in the world, which is a great achievement of our country. This result is assessed not only by the quality and quantity of weapons, but also by the fighting skills, experience, courage and agility of our soldiers. The role of the defenders of the Motherland is unique, every country faces ignorance where there is no military support.

For a young country, it is its backbone and backbone army. In addition to the above, we can all say that we can all contribute to the development and peace of our country, and more precisely, the higher our spirituality, legal consciousness, internal attacks, spiritual the ideas of corruption can never entice us. The currents that provoke internal attacks with selfish motives are waiting for a single goal, that is, the self-weakening of the homeland by its own civil wars and conflicts, the first of which is to poison our spirituality. The strength of the right army is very important for the country, but the strength of the consciousness of the people is even more important. At this point, I have added a number of my own ideas, the ability to accept it and apply it in life is in the hands of each person. There are many commendable roofs of our army, and we can proudly say that our military leadership is a world leader. A country without defenders is no different from a house without a door. Wondering why it's exactly like the door? Entering and exiting through the door, assuming that our house does not have a door, the invaders are also malicious people, thieves also enter the house and overthrow it, and there is no doubt that it is impossible to live in such an apartment and even if he lived, he would not be happy in his heart, he would not consider himself free and protected, and anyone could even destroy him. Do you understand that nothing can replace the place of our military forces in our lives, that our well-being, our freedom, our peace, our security will be in their hands?

The conclusion drawn is the power of influence on the minds of the younger generation. Not only the military but also the entire population of the society can contribute to the defense of the homeland, as we can see from the above-mentioned ideas. The guards of the homeland are always ready to serve the people, whether it is cold, hot or night, and their day is calm and peaceful, and the sky is clear. Realizing how responsible their profession is, all servicemen risk their lives to spend time away from their families and perhaps almost every day at work, the hardships of this profession are great and everyone unable to perform the military service profession. They work tirelessly to be ready for danger at any time, harden themselves, and unlike many professionals, they are almost never in the arms of their families. If we count again, it is difficult to justify this account. Many young people say that when they grow up, they will be in the military, they think of being as strong as the military, they envy the uniforms they wear, and they think that they will do a lot of heroism in the future. However, the sense of homeland that emerges in the younger generation, the love of the profession is very beneficial for the future. No one can put out the fire that shines in the eyes of young people, whose love for their homeland is boundless. We congratulate the defenders of our homeland on the coming holiday. We wish them success, our country will always be peaceful, the sky will be clear, and our happiness will never be lost!!!
