Annotation: In this article, we will try to convey to our young generation the perseverance of the people of Uzbekistan and the fact that they sacrificed their lives for the country. In 1939, people worked tirelessly to build the Fergana canal. In 1940, dark days began to befall our people, and we were informed about the beginning of the war. The war between Germany and the USSR did not fail to show its effect on our people.

Key words: Love for the country, duty, initiative, front, war, defense, martial art, fortitude.

We will try to convey to our young generation the perseverance of the people of Uzbekistan and the fact that they sacrificed their lives for the country. In 1939, people worked tirelessly day and night to build the Fergana Canal.

In 1940, dark days began to befall our nation, and we were informed that the war had begun. The war between Germany and the USSR did not leave its impact on our people. Men from families began to be taken to the war.

In 1942, Lelingirant was besieged, and the Uzbek people helped the USSR a lot in this battle. If there were any male members of the family, they were sent to the front, even if there was only one male in the family, they went to Lelingirat with their own wishes. Meanwhile, after a few months, some families black letters started coming, mothers, women who received this letter cried, children became orphans, those who were left behind from the war in 1943 rushed to the front, and those who did not go, our people hated men who did not go to war, they did not see men as human beings. They sacrificed their lives for the country. They tortured the prisoners in such a way that they burned them alive and buried them alive. throwing bread into it was humanity and to see them trying to get bread, even though they could not kill each other for bread, but no matter how hungry they were, no matter how much they suffered, Uzbeks did not lose their human spirit and did not throw themselves at bread like dogs. despite this, women worked tirelessly in the fields to deliver food and clothing to the front. At the same time, the traitors who ran away from home in order to escape the war, were cursed by the people and perished. We can take as an example the family of aunt Nazira, who lost all her sons who fought for the motherland. One son was taken prisoner, he did not sell his country, he died until March. His son, Chori, was hanged, and the third son fell under a bomb because he was trying to save his friend. there were millions of families, and at the same time there were no cowards running away who did not want to go to war.

Yon panellar This is a great help for us to learn from the past historical events, to grow up loyal to our country and to grow up to be boys who will serve our country worthy, and to grow up to be patriotic children who protect their native land. it means the importance of this, we should also take into account that the traitors who betrayed their country out of cowardice in the events of this past war were definitely killed, and because of betraying the country, they were humiliated and tortured, ruined their two worlds, and remained alive under the curse of the people. because they cursed them until they die. For this reason, following the example of our fathers and grandfathers who showed patriotism and courage in the past historical wars will be a great motivation for us to grow up as patriots and love for the country. In this regard, we should show the services of our grandfathers who showed heroism in the war in films or events, to increase the number of brave boys who will join the ranks of our Armed Forces, and for the young people who will not spare their lives for their country to join the ranks of the Armed Forces, this historical film and events will be of great importance. and I learned from the movies and I realized that my love for the motherland is necessary to preserve it. I learned from these films that there are ilhaq films. One of these films is Ilhaq. After watching this film, I became more

loyal to the country. The actors and directors who worked in this film performed their duties admirably. It was filmed on the initiative of Shavkat Mirziyoyev. The name of this film is Ezgufilm. This film is based on the work of Alinazar Egamnazarov's Mother of Five Warriors. The artist of the film is Zilola Sobirov, and this artist has done his work admirably, because he pretends that the previous situation is happening again. The authors of the screenplay are Johongir Ahmedov, Hasan Tashkhojayev. Costume artist Zuhra Ganiyev, and this artist's mastery of his work is evident when watching the movie, as he was able to embody that era. Picture detector Hatam Hamrayev. v. Art Director Shuhrat Ziyoyev. Project Manager Firdavs Abduholikov. Producer Zafar Yoldoshev. Producer Jahongir Ahmedov. Rohmatullah, Qurbanov, Rayhona Asadova, Husan Rashidov, Yigitali Mahmudov, Saidon. The following actors and actresses have performed their duties perfectly.

The film taught me to love the motherland, to love the motherland, that the motherland is sacred, to give my life for the motherland. These films help our young people to love the motherland and increase the spirit of patriotism. For example, after watching this film, I drew my own conclusions.

I have learned to love this country, not to betray the holy country, I must say that the role of movies is very important in educating young people to be patriots, because I saw an example of this in my own life. The contribution of the Uzbek people to the Second World War was great. In 1941-1945, on the fronts of the Second World War, which brought unprecedented calamities to humanity, Uzbek fighters also showed the heroism of trying to pay tariffs. 9 million 226 million loan money and 52.9 kg of gold and silver were handed over. 7.518800 gymnasts, 2.636700 cotton boots and 2.221200 comfortable boots were sent to the army. 282,000 tons of grain, 482,000 tons of potatoes and vegetables, 1,000 tons of sugarcane products, dry fruits, and wet fruits were sent by Alari.
