

The Concept of "New Uzbekistan-Enlightened Society" As a Factor of Spiritual Upgrade

Hamrayev Bobomurod

TerDPI 2nd year methodology of teaching social humanities
Master of spirituality

Abstract: This article presents a lot of scientific information about the concept of "new Uzbekistan-enlightened society" as a factor of spiritual growth.

Key words: enlightened society, spirituality, scientific, creative, spiritual and moral values, cultural and educational progress, love and loyalty to the people.

Shavkat Mirziyoyev said that in order to turn New Uzbekistan into a country with high culture and spirituality, where free and happy people live, the concept of "New Uzbekistan - an enlightened society" and a national program for its implementation will be developed.

This, first of all, allows us to enrich and develop our spiritual and moral values in accordance with the requirements of the time, thereby achieving the cultural and educational progress of society.

In turn, this serves to expand the consciousness and thinking, philosophy of life and worldview of the members of the society.

In this regard, the highest goal is to raise the intellectual potential and worldview of the population, especially the youth, and to educate a well-rounded generation that lives with a sense of patriotism, love and loyalty to the people.

Special programs aimed at further increasing the role and influence of the fields of science, culture and art, literature and artistic creativity in the development of our country are accepted.

Continuous attention to creative intellectuals, material and moral support, improvement of working and living conditions will be continued.

Comprehensive measures will be implemented to further improve the material and technical base of cultural and sports institutions, theaters and museums.

Targeted activities aimed at the cultural development of regions and the development of folk crafts are carried out on a systematic basis. The issues of ensuring religious tolerance and interethnic harmony in our country, protecting our citizens from various ideological threats, harmful currents and ideas will continue to be in the center of attention.

Our holy religion is valued as an embodiment of our virtues. In our country, the policy aimed at creating the necessary conditions for various religious denominations will be consistently continued.

As the head of our state noted, we set the principle "For human dignity" as the main criterion of all our reforms. In order to implement the noble idea of "the state is for the people", we developed the development strategy of New Uzbekistan for 2022-2026 based on the opinions and suggestions of our people in direct consultation with our people. The body of society's life is economy, its soul and spirit is spirituality.

The New Development Strategy of Uzbekistan covers seven priority directions, and in essence, the issue of ensuring spiritual development and bringing the industry to a new level is defined as one of these priority directions. It differs from the Action Strategy. In this sense, it is appropriate to talk about the goals and tasks related to the provision of spiritual development defined in this programming document.

Within the framework of the implementation of the 76th goal of the development strategy entitled "Further development of the spheres of culture and art, improvement of the material and technical base of cultural institutions and objects":

- material support of representatives of culture and art, creators, as well as teachers and employees working in this field and improvement of their living conditions;
- development of theater art and strengthening of its material and technical base;
- introduction of events aimed at popularizing national culture at the international level in the regions;

• It is also significant that practical measures have been established to properly celebrate the anniversaries of famous creative intellectuals who made a worthy contribution to the development of the culture and art of the Uzbek people, to widely promote their lives and activities, and to perpetuate their memory.

All this clearly shows the scope of development of important areas of art that serve to improve human artistic and aesthetic taste. After all, can't it be based on nationality and promotes universal ideas such as goodness, nobility, friendship, solidarity, and spiritual maturity.

Therefore, we are all equally responsible for the comprehensive development of our national art, for our talented young people to study and demonstrate their creativity. Today, there is fierce struggle and competition in the world, and the conflict of interests is increasing day by day. In particular, one cannot be indifferent to the fact that the processes of globalization create new opportunities for humanity, as well as unexpected problems. Because threats and dangers against the national identity and moral values are becoming more and more intense in these same global processes. At the moment, only think about yourself, work, family.

It should also be noted that at the same time, human values are being destroyed in many regions of the world. Even in most countries with economic development, spirituality is facing a crisis.

It is especially regrettable that in the conditions of the pandemic, the moods of intolerance and aggression are increasing in some countries. All such alarming realities that are happening in the world today once again confirm that the President of Uzbekistan is right, that is, it is necessary to ensure the harmony of economic and spiritual growth.

In conclusion, among the achievements in all other spheres of the life of New Uzbekistan, the high spirituality of the Uzbek people, the rich national cultural, historical and educational heritage, in particular, literature and calligraphy, music and dance, cinema and theater art, architecture and handicrafts, jewelry and carving, cooking and confectionery skills should be widely and consistently promoted to the world.

As the President noted, an educated person has faith. Each nation creates its own spiritual vaccine. Today's spiritual poverty is a just reality. Currently, we are taking measures to end economic poverty, but we cannot yet boast of our results in ending spiritual poverty. In this sense, we must achieve the harmony of economy and spirituality.

It is noteworthy that the development strategy of new Uzbekistan consists of seven directions. This number is considered as a characteristic symbol that brings happiness and good luck, and realizes good intentions.

Implementation of reforms in the spiritual and educational spheres is defined in the fifth direction of the seven directions. It is planned to implement the concept of "New Uzbekistan - an enlightened society" in this direction. Priority is given to the promotion of culture and art, education of young people in the spirit of healthy faith, strengthening of inter-national solidarity and mutual respect.

Shavkat Mirziyoyev said that the concept of "New Uzbekistan - an enlightened society" and a national program for its implementation were developed to turn New Uzbekistan into a country with high culture and spirituality, where free and happy people live.

Based on this concept, a number of works have been carried out effectively. In particular, events on the theme "Educated youth - pride of the nation" held in the district secondary schools, first of all, allowed to enrich and develop the spiritual and moral values of young people in accordance with the requirements of the time, thereby achieving the cultural and educational growth of the society.

"Let's live freely and prosperously in the new Uzbekistan", "Increasing family discord - the decline of society, the tragedy of the nation", "One enlightened person - mentor to ten young people", "One intellectual - spiritual patron of one neighborhood" The events organized in all neighborhoods of the district on the basis of the principle served to expand the consciousness and thinking, philosophy of life and worldview of the members of the society.

In order to raise the intellectual potential and worldview of the population, especially the youth, and to educate a well-rounded generation that lives with a sense of patriotism, love and loyalty to the people, events were held under the slogan "A brave soldier is an example for the youth".

In order to support culture and sports, theater and reading, "Labor team that sang the national anthem best", football and basketball competitions were organized. "My contribution to the development of the country" competition, "The best reader", "The best reader neighborhood" aimed at further increasing the role and influence of science, culture and art, literature and artistic creativity in the development of our district",

"Mother and Child Reader" competition, "The Most Exemplary Spirituality and Enlightenment Room" competition took place.

In order to ensure religious tolerance and inter-ethnic harmony in our country, to protect our citizens from various ideological threats, harmful currents and ideas, religious tolerance and inter-ethnic harmony events were held and immunity from various ideological threats, harmful currents and ideas In order to educate young people, roundtable discussions on the topic "Drug addiction is the plague of the century", propaganda work on the topic "International terrorism and religious extremism are enemies of development", and activities on "Effective organization of anti-corruption activities" were organized. videos that form immunity against harmful currents and ideas have been released.
