**Annotation:** the concept of patriotism in the mind of youth This article reiterates the importance of patriotism.

**Keywords:** idea of independence, national, CHQBT, need, in vain.

The President emphasized that every nation has the right to build its own life and future independently only if it is free and independent.

"It is not paid, it is paid!" This was the great goal of our great ancestors who sacrificed their lives for the liberation of the nation. No matter what dangerous and turbulent times we go through, no matter what achievements and results we have achieved, the idea of independence and the spirit of independence have always been our mountain of support.

Today we can say with boundless pride that with the foresight, solidarity and selfless work of our wise people, we have passed all the tests with dignity. From this point of view, Independence Day, which restored our human dignity, pride and honor, our religion, our national statehood, will always be the brightest page in the glorious history of our Motherland.

Today, when we talk about our country around the world, the phrase "New Uzbekistan" is used. This is a recognition of the fact that in recent years we have entered a completely new stage of development and achieved great things.

It is true to say that in modern times, when the great power of our people is in full swing, the foundation is being laid in Uzbekistan for a new revival - the Third Renaissance. Because today's Uzbekistan is not yesterday's Uzbekistan. Our people today are not the people of yesterday, "the head of state said.

Patriotism is a concept that expresses people's love and devotion to their homeland. Patriotism is one of the universal human feelings and spiritual values that have been common to all people, nations and peoples. Historically, patriotism is also a set of emotions that people have developed in the course of their social development in connection with the destiny of their homeland, the struggle of peoples for the inviolability and independence of the territory in which they live. This is reflected in the pride of the country's past and present, in the protection of its interests. It is not for nothing that it is said that love of country is faith. Patriotic people are very common in our country. For example, Abdullah Avloni, although he lived during the years of repression, freedom of speech is very developed in him. He is known in our country for his children's textbooks. His work in teaching children foreign languages, literacy and other teaching is commendable. In school-age children, every teacher emphasizes the love for the motherland before school. In the upper grades, the Ministry of Education determines the love for the motherland. CHQBT science program launched is happening. Educating young people in the spirit of military patriotism has its historical roots. Legends of Shirak Tomaris, Spitamen, Dalvarzintepa In the epics of Gorogly Alpomish, the feelings of readiness to sacrifice one's life for the Motherland, courage, perseverance, devotion to the motherland are glorified. The idea of patriotism is also sung in the works of Eastern thinkers (Abu Nasr Farobi, Abu Rayhan Beruni, Zahiriddin Muhammad Babur, Alisher Navoi). In particular, Abu Nasr al-Farabi connects human perfection with patriotism and admits that "without the use of the blessings of the intellect bestowed by Allah, one cannot attain the rank of a mature human being because it is the most perfect and mature end of human development." . Therefore, true patriotism can only be inherent in a mature person. Zahiriddin Muhammad Babur's deep feelings of patriotism in another country are reflected in his works.

The desire for manhood, the need to live freely, is a feeling inherent in man. Man can live freely and freely only in his homeland. Therefore, the struggle for the freedom of the homeland has long been the main theme of the works of scholars and doctrines that express noble ideas. For example, the Hadith states that loving one's country is a matter of faith.

In his works, Abdullah Avloni defines the concept of "homeland" and notes that the struggle for its development is a characteristic of a patriotic person: "Everyone's city and country of birth is called his homeland. Everyone loves the place where they were born and raised. Even this sense of homeland is present in animals. If an animal loses its homeland, it will not live as happily as in its own land.

The role of military patriotism in the formation of a sense of patriotism in young people is also invaluable. Military patriotic education is a pedagogical process aimed at preparing young people for national defense and military defense, the formation of their skills and abilities to organize military defense in emergencies. The purpose of military-patriotic education is to prepare young people for the defense of the homeland and military defense, to form in them the skills and abilities to organize military defense in emergencies, in the process of which the following tasks are performed: imparting theoretical knowledge and developing practical skills;

2. To prepare young people for the prevention of threats to national independence, state building and the constitutional order of the Republic of Uzbekistan; on the basis of cultivating ideological consciousness, cultivating in them a sense of hatred against terrorism and religious extremist ideas;

3. Creating the necessary conditions for military and technical training in the field of national defense;

4. To be able to take appropriate measures in emergencies, as well as to develop skills and abilities to defend against armed attacks; increase vigilance in them, and so on.
