Antomation: "The reasons for the crusades in which the crusades participated in these marches, leaders, managers of the crusades, were highlighted by issues such as the importance of managers, crucriptions, the importance of crusades for Europe.

Key Windows: Cruses, Maniksert, Alexei, Urban LL, Clermon, Pyotr Aensky, small Armenia, Ludovik VLL, Konrad LIII.

In the crusades, military-colony-colonisms expeditions in the Middle East in the Middle East in the Middle East, in Palestine, in Palestine, in the Middle East, in Palestine, in the Middle East, in Palestine, in the Middle East, in Palestine, and in Palestine, in Palestine, and in Palestine, in the Middle East, in Palestine, and in Palestine, in Palestine. Externally, these expeditions were expeditions in the religious church, as the Catholic Church was announced that the struggle was against the volume against Islam and Christianity against Islam. The causes of crusades in the second half of the XLs part of the United King-century should search for the Middle East in the Middle East, partially common economic development and sharply European conflicts. The end of the XL century The Greek Matta at the time of the Crusades at the age of the century was the issue of farmers. Pope Urban LL found a church summer in Kolermon in the fall of 1095, and was inquiry to the east to fight the disbelievers. The main study of the Urban was "Jesus made his favbar's tomb and deliver the holy Palestinians. (1).

The beginning of crusades came to 1096 to 1096. In the spring of 1096, the partly wender of the western France was able to crawl. Monax Peter Aensky (Peter Pustinnik) and small owner knights and small owner Ricensky Walter Walter are headed by the farmers. Crusad peasants were unusual, even more impartial, even more impossible to harass heavs and robbery. This was known before the Crusades were arrived in the land where disbelievers lived. They fired through the countries such as Hungary and Bulgaria and continued to robbery. When the Crusaders entered Constantinoples, the emperor was a hurry to give them a small Asian coast. The Crusades on the coast of Asia soon came to embrace the Turkish eyebrow, and they wiped the coporic part of the Crusades. Thus, the wand of the Crusaders did the eastern it was completely defeated. (2).

The crusions as military expeditions ended with absoluteness. The European feires could not build a solid state in the east. The invisible came to leaving almost all areas. Despite military failures, the crusaloms were greatly worked the importance of European European development. First of all, crusades helped to develop Europe trade in mid-sea rich countries. As a result of these crusions, the trading monopoly in the Middle East was formed, where it was stody of Italy, Southern France and Eastern Spanish (Catalania).

But as the crusades say about the influence of the west, the Arabs are also said to be shot in other ways, including through different ways, including in Spain. For example, farmers were released from the Krepostnoy dependence, the development of centralized dainsa, the development of cities was nothing more than a typical process of historical development in Europe. Crusades quickly accelerated the development of these most important events in the life of the Europe of Europe. (3).

The reason for the crusades, the reason for the crusades, was also aimed at the fact that the crusades of the secular goals, but aimed at the crusades of the secular destination. This margin was Edin aimed at the

release of the grave of God, but it was completed with the robbery of constantinopol. We can say that the turbidity of the turbidity has become the war of the West and Christians of the East. As a result of these march, it was great for the west of the west of East and its culture.

The Crusades in the East in the XLL-Halls in the East got acquainted with the people of Jesus, "Jesus," and got acquainted with the culture, custom and science technology here.
